

Toulon from Majestic showers

Since 1968, The Majestic Shower Company have been designing & manufacturing the finest quality glass shower screens & enclosures available. As well as their beautiful, sleek & minimalist look, every Majestic product is engineered to the very point of perfection. There is no such thing as standard at Majestic. No matter what the size or function required, Majestic offers a bespoke service that is second to None. Visit our showroom to view our new Toulon sliding door enclosure & see the design & quality for yourself.

Villeroy & Boch Subway

To compliment its bestselling range of sanitary ware, Subway, Villeroy & Boch have introduced the new Subway

range of taps & showers. Manufactured in Germany for Villeroy & Boch by Dornbracht, their clean & simple design is matched by the quality & feel of every product in the range.

Geberit wet room floors with in-wall drainage

Already known for its innovations in bathrooms & drainage, Geberit have again invented a new concept in wet room floor technology. The new in-wall drainage system allows a greater volume of water to be removed from the wet floor area. It is also very visually appealing with its minimalist look & easier to install, as its position does not effect under-floor

heating or floor tiling. Geberit have also teamed with On The Level, UK manufacturers of standard & bespoke wet-floor shower tray formers. This partnership means that no matter what the size or installation requirement, Geberit & On The Level can produce an attractive & reliable wet floor solution for every room.
